DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
Group I, Claims 1-19, drawn to Method for Fabricating a Semiconductor Device, classified in class 438, subclass 305.
Group II, Claims 20 and 21, drawn to Semiconductor Device, classified in class 257, subclass 336+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the device of Group II can be manufactured by multiple doping steps to form triple LDD by forming three different polysilicon spacers on the gate and selectively doping the spacers at different doping level and performing solid state diffusion process at different energy level to diffuse the dopant from the polysilicon spacers into the substrate and thereby forming the triple LDD region in the substrate instead of forming spacer having first thickness, the second thickness, third thickness, and fourth thickness and perform an implant (i.e., single implant) to form triple LDD structure.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. José S. Garcia on May 25, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
